

Fever Control at a Prep School

 \sim Yotsuya Gakuin, Preparatory School \sim

■ Introduction of Yotsuya Gakuin

Yotsuya Gakuin deploys 20 preparatory schools for university entrance examination, and 25 individual classrooms from elementary to high school students all over Japan.

By class selection ability to each subject and 55 steps individualized instruction,

it achieves "NOT a pass to university where you CAN go, but a pass to university where you WANT to go"

Yotsuya Gakuin introduced thermography which allows instantaneous and non-contact body temperature measurement in order to enhance their flu control management, which is in addition to their conventional measure of temperature measurement and hand disinfection of the staff and student before entering the school.

Thermography is placed at all school buildings of Yotsuya Gakuin.

Great amount of care has been taken for student who are going to take university entrance examination

Measuring temperature of a student who checks in a self-study room at a reception desk.

■ Profile

Name: Yotsuya Gakuin Established: 1974

Address: 1-10, Yotsuya, Shinjuku-ku, Tokyo, Japan

Phone: +81 3-3357-8401 Number of employee: 800

(Excluding part-time teachers)

■ Left: Mr. Nakamura Right: Mr. Shiraki They are in charge of operating thermography as new flue control

■ Effect after installing thermography!

No fever from the new flu has been found so far. However, Yotsuya Gakuin's action of installing the thermography is welcomed by students as well as their parents to give them sense of security during one of their most important time of life.

Also, as thermography is compact and light weight which makes it easy to carry, temperature screening can be done anywhere. They hosted training camp, where they also used the thermography to check each student.

They plan to use thermography continuously even after the new flu is contained, to control a seasonal flu.

Thermography installed in front of reception.

Measuring surface temperature of a student.

Teachers execute hand disinfection by an alcohol placed by the side of PC by which they register their attendance.

■ Recommended Models

We recommend following models for the fever screening application.
